

AER ENVIRONMENTAL POLICY

Remanufacturing is recognized as the highest form of recycling because like-new products are produced while minimizing the impact on the environment.

AER Technologies, Inc. (**AER**) is committed to reduce our environmental impact and continually improve our environmental performance in our operations, products, and services to meet the following environmental program goals and objectives:

- **R**educe, reuse and recycle
- **E**nsure compliance with all applicable legal and other requirements
- **M**anage and communicate our environmental management system effectively
- **A**chieve continual improvement by setting and reviewing objectives and targets
- **N**egate harmful activities to prevent pollution to our air, water and land
